

Dale Stevens

Oakland, Maine · [dstev.dev](#) · [linkedin.com/in/dalelstevens](#) · [github.com/dstevdev](#)

Full-stack developer and graphic designer completing a BS in Software Engineering in December 2026. Built and launched Impact, a planning tool for security integrators. Previously led operations for a 40-person business with over \$4 million in annual revenue.

PROJECTS

Impact · [getimpact.dev](#)

Next.js, TypeScript, Supabase, Mapbox GL, Stripe

- Built a planning and installation tool for security integrators: designers place devices on a map or blueprint and export a PDF plan, and technicians work the same plan on a phone, offline if needed.
- Enforced permissions and plan limits in the database with row-level security, added seat-based billing through Stripe, and covered the app with Vitest and Playwright tests.

Music or Lose It

React, Supabase Realtime, Deezer API

- Built a music quiz with a global leaderboard and real-time two-player matches joined by a four-digit room code.

AsmStudio

Python, PySide6, Capstone, Claude API

- Built a Windows disassembler and decompiler for beginners that shows each function's assembly beside equivalent C, with a plain-English note on every line.

Smokey

Arduino, ESP32-S3, Supabase

- Built a wood stove flue monitor: a K-type thermocouple and a Feather S3 stream temperature readings to Supabase, with configurable alerts.

More at [dstev.dev](#): LinkChop, e-Closing Export and YoLink Desktop Monitor.

EXPERIENCE

Marketing and IT Technician, InfoTech Maine, LLC

Feb 2024 to present

- Ran social media campaigns that increased unique website visitors by 35%.
- Built custom Zapier connectors to automate internal workflows, and design and maintain the company website.
- Install and configure Verkada and Ubiquiti security camera systems, and resolve support tickets through ConnectWise.

Owner, Maine Design Studios

Jun 2022 to present

- Design logos, business cards and marketing materials for clients, and build and manage their Wix and WordPress sites.

Lead Design Artist and IT Manager, Barefoot Custom Coatings

Apr 2021 to Oct 2023

- Designed more than 300 unique projects and patterns, and ran laser marking and engraving on titanium, aluminum, polymers and Cerakote.

Vice President of Operations, AAW Vape Inc

Nov 2018 to Feb 2022

- Led a team of more than 40 employees at a business with over \$4 million in annual revenue.
- Ran operations, marketing strategy, financial analysis and IT, including Azure and QuickBooks server maintenance.

Marketing Director, AAW Vape Inc

May 2017 to Nov 2018

- Built a MySQL database and web front end that let customers place custom orders online.
- Planned and ran marketing across a loyalty app, SMS, email, radio and television.

EDUCATION AND CERTIFICATION

BS Software Engineering

Western Governors University, expected December 2026

AWS Certified Cloud Practitioner

Amazon Web Services

Business Administration

Husson University, 2019

SKILLS

Web and code JavaScript, TypeScript, React, Next.js, HTML/CSS, Python, PHP, SQL

Platforms Supabase, Vercel, AWS, Google Cloud Platform, Stripe, WordPress, Wix

Design Photoshop, Illustrator, InDesign, Blender

IT Hardware troubleshooting, Office 365, ConnectWise, Verkada and Ubiquiti systems
